TESTIMONIAL

COMMUNICATIONS SPECIALIST LTD **Unit R, Loddon Business Centre, Roentgen Road, Basingstoke RG24 8NG**

SweetSpot are the owner/promoters of the Women's Tour (WT) & Tour of Britain (ToB), international professional cycle stage races in the UK

Communications Specialists have been our radio comms supplier for ToB since 2007 & for WT since it's first edition in 2014. Over these past 16 years they have worked very closely with SweetSpot to develop the most robust, reliable & essential comms provision for the race convoy, both the event cars & motos.

On event, these vehicles are fitted with all radios required, by their highly qualified technicians, ensuring each piece of kit is installed to the highest standard & to the specific requirements of each user.

They have also developed a tracking system for the convoy vehicles which has proved a vital tool for Event Control to manage the race throughout each stage

During the event, Communications Specialist provide essential technical support to guarantee race radio coverage throughout each stage.

In addition, they also supply all handheld radios at both stage starts & stage finishes, including at the finishes the installation & programming of repeaters to ensure successful & dependable comms.

Communications Specialist are an integral part of the team that has successfully delivered both ToB & WT for many years, bringing their depth of knowledge & expertise of event comms to our races year after year.

They are incredibly professional, reliable & possess a problem solving/'can do' approach to all aspects of comms, essential when working on our races.

To summarize, Communications Specialist provide a fantastic service, utilizing the latest equipment & knowledge, I would recommend them to any event organiser.
